Printing

- ❖ Experiment with your printer's print quality. You should get good results printing at Standard Quality. But you may want to print at the highest quality available for your printer.
- ❖ Set your **Page Scaling to None** in the Printer's dialog box. You may get an error message. Just ignore it.
- ❖ Since this pdf contains many pages make sure you set your print options to print: **current page**.
- ❖ If you are having trouble with parts of the <u>design</u> (not the instructions) not printing around the edges, it means your printer has wide margins. Just adjust the print setting to fit to paper. This is not recommended for cards.
